

3X reduction
in power consumption¹

“Thanks in large part to the Intel Xeon Scalable processors, the Lenovo ThinkAgile HX platform has given us a huge performance boost, helping us to deliver a great user experience for Arihant Mobile customers.”

**Dipak Rout, Head of IT,
Arihant Capital**

Taking the Trading Experience to the Next Level with Mobile Services

Arihant Capital Markets Ltd is one of India’s leading financial services providers, offering security, equity and commodity trading, financial planning and merchant and investment banking services to more than 145,000 customers. In response to demand, the company developed Arihant Mobile: a state-of-the-art smartphone app that lets customers swipe to trade, track their portfolio in real-time and get live streaming stock-market data. Arihant Capital needed to find the right infrastructure to run its new mobile application. With help from Orient Technology, Arihant Capital replaced its existing three-tier architecture with a three-node Lenovo ThinkAgile HX1320 cluster with powerful Intel® Xeon® Scalable processors and Nutanix Enterprise Cloud software for agility and flexibility.
