

Boosting Business Agility to Keep Pace With The Latest Home Décor Trends

The IRSAP Group is a market-leading, family-owned, Italian business in the European heating and ventilation sectors. IRSAP has continuously expanded its product range to give customers greater choice. Manufacturing such a highly customizable range of products is extremely complex. As such, IRSAP requires clear insight into every aspect of its operations. To accelerate production planning and manufacturing processes, IRSAP modernized its business applications and IT infrastructure. To move its mission-critical SAP ERP applications to SAP HANA, IRSAP chose a Lenovo ThinkAgile HX Solution for SAP HANA, powered by 2nd gen Intel® Xeon® Scalable processors and Nutanix Enterprise Cloud software.

“Since migrating SAP ERP to the SAP HANA platform on Lenovo HCI, batch processing jobs are 50% faster on average.¹ Thanks to the Intel Xeon Scalable processors, end-user application performance has also improved by around 33%, empowering employees to work more productively.”²
